**Comprehensive Bone
Regeneration Solutions**

Tissue Regeneration...

the foundation of esthetic excellence

Today's patients have increased esthetic demands. To meet their expectations, clinicians rely upon tissue regeneration to create the foundation for beautiful outcomes. Our complete line of proven allograft products and ancillary instruments cover virtually every indication for both hard and soft tissue grafting. Call today to find out what thousands of doctors already know about BioHorizons Regeneration products.

GRAFTON DBM - Demineralized Bone Matrix

Composite sinus grafting, periodontal defects and lateral ridge augmentation

MinerOss - Cortical and Cancellous Chips

Composite sinus grafting, socket grafting and lateral ridge augmentation

AlloDerm GBR

Graft containment, soft tissue augmentation and flap extension

AutoTac

Membrane fixation with a retrievable titanium tack

grafton[®]
Demineralized Bone Matrix (DBM)

- Most robust osteoinductive response of all DBM products tested in the athymic rat model^{1,*}
- Bone fibers for superior osteoconduction
- Multiple forms deliver excellent handling characteristics

MINEROSS[®]
CORTICAL & CANCELLOUS CHIPS

- Clinician-preferred blend and particle size
- Mineralized Cortical chips for space-maintaining structure
- Mineralized Cancellous chips for rapid revascularization

AlloDerm[®]
Regenerative Tissue Matrix
GBR

- Demonstrated to increase soft tissue thickness
- Shown to improve bone regeneration
- May be left exposed to the oral cavity

BIOHORIZONS[®]
autotac

- Patented, one-handed delivery system
- Penetrates cortical bone without pre-drilling
- Fixes membranes in seconds, not minutes
